Standalone Design Review (Drawing Manager): Whether you're sharing your drawings or working on them on your own, Drawings Manager makes it easier to work on different files simultaneously. And with the new Design Review feature, you can have multiple people collaborating on the same drawing while you're outside of the drawing. Design Review: Drawings Manager includes Design Review, which allows multiple users to view the same drawing from different locations and simultaneously make changes. Design Review allows you to use your mobile device in new ways. You can easily review changes made on a drawing stored on your mobile device without having to export a file and then upload it to your PC. (video: 1:05 min.) Visible Annotations: Using our new VAN module, you can add text or lines to a model to make your drawing more understandable. Annotations can be placed on any view of a model, and you can hide or temporarily disable them. You can even use VAN to make other model elements transparent. Photo Annotations: You can import photos into your drawing directly, and adjust them to match your model. Use the new photo templates, or create your own, and then apply any photo to any model. You can also scale, rotate, and move the photo to better match your model. Align: Make sure your objects in your drawings are in the correct position in the space around them. Align adds a new toolbar to the Pan tool, letting you set the alignment of objects relative to one another. For example, with the alignment tool, you can align doors to fit on walls, or walls to a specified door width. 3D panorama rendering: 3D panorama rendering lets you create 3D panoramas from a series of photos. This feature is now available from the photo import tool.
