A 70-year-old male who had been well was admitted to our hospital because of high fever and pleuritic chest pain for one month. On admission, he was fully conscious and had no remarkable neurological abnormalities. Laboratory examinations revealed anemia with mild thrombocytopenia and increased fibrinogen level. Factor VIII activity and ristocetin cofactor activity of platelet factor were markedly decreased. Bleeding time was markedly prolonged and platelet adhesiveness to glass or collagen and aggregation response to ADP were markedly reduced. We diagnosed acquired von Willebrand's disease (vWD) because of markedly prolonged bleeding time in conjunction with marked decrease of factor VIII activity and ristocetin cofactor activity of platelet factor. Intravenous injection of prothrombin complex concentrate was effective for the therapy of his respiratory infection. Monday, February 6, 2009 WIN a \$1,000 voucher! In Greek Mythology Osiris and Seshat are two brother gods in the Egyptian pantheon. They're venerated by the followers of Ra at his Heliopolis temple in the Egyptian city of Memphis. The exact origin of the Osiris myth is uncertain. The story was recorded in Greek sources at least as far back as the fifth century BCE and was popularized by ancient Greek writers such as Plutarch. .
