Like the sons and daughters of the two crowns of Europe, scholars do not like to be told what they can and cannot write about. They are able to defend their work, and I am able to defend their work, if that's what they want. But I don't want to tell them who they can and can't teach their theory. This will be their theory. It will not be my theory. And I think scholars are perfectly capable of putting the theory into practice. But

I also think there are a lot of students who desperately need that theory, and who will need it in order to compete effectively. And I think that's what universities are supposed to do: Make sure that the students who come to us are prepared to compete effectively.

Audience member: Do you think the writers who use these arguments about "low-energy" higher education aren't dismissing women and people of color? The go-to arguments for lower enrollment are pretty pathetic: Because of race, people don't show up to school. It's real simple. You show up?

Wireless webcam software for smartphones Owner Steven Sim explains why he believes the great white shark which swam up to his boat in an afternoon in the late 1990s was responsible for the death of a fisherman. (4PR) Each year, a great white shark comes up to California's Farallones National Marine Sanctuary and swims on the surface of the ocean waters. But while it may swim on the surface, when it comes to eating, it's rather one of the deep-sea sharks. Just the same, a skiff full of charter boats were some way away from the massive shark last month when it just so happened to have stopped swimming on the surface. Now, a fisherman is one of the 11 men injured when the shark bit him. But, there's a big problem. That's because the dead shark the fisherman was calling a great white turns out, not to be. "It's exactly the species, yes," says shark expert and consultant Stephen Sim. That expert says the two-metre shark, which was found about five metres off the Farallones Beach on May 24, was a great white shark but as it has been going on for some months and no one has seen it, it is probably a small resident shark of the sanctuary. He says the Farallones is a really special place for a number of great white sharks. "The Farallones really has the most regular and abundant great white shark population of any area of the world," says Sim. "It just happens that the shark in this particular case was in the area of the Farallones for quite a number of years." But shark-munching makes the beast even more significant than the bloody flesh it was in search of. "It's just a completely interesting case," says Sim. "Not only was it the shark that basically was responsible for the sinking of the boat that the fisherman was in, but that's the shark that bit the fisherman on the leg and kept biting him until, thankfully, he was rescued." Now, Sim says the fisherman will

Perhaps you've heard of the BlackBerry PlayBook, a tablet designed for the increasingly popular e-reader market. It is very capable and has a very large selection of apps available. Now, if you're an e-book enthusiast, the fact that the PlayBook has a wide assortment of applications that you can install is great. That's because you can use them with relative ease. However, there is one limitation that you should be aware of: none of them are compatible with Android apps, or indeed, any other Android-based devices. Well, that's good for the BlackBerry PlayBook, but isn't it bad for you? The point is, if you've downloaded applications from Google Play or any other source on the Android OS, you won't be able to install them to your BlackBerry PlayBook. This is because the PlayBook runs the BlackBerry OS, not Android OS. Yet, despite this inconvenience, the BlackBerry PlayBook is a great tablet - it's versatile, powerful and it has a lot to offer. It is also the most versatile and powerful device in the device. In fact, it is more powerful than some desktops. Such is its versatility, you can even add some desktop functionality to it, if you wish. You can of course carry it around with you on the road, or use it at the office. In short, it is all about its versatility. So, if you're thinking of purchasing a BlackBerry PlayBook, then why not check out all the features and functions available. Q: Cannot differentiate between dates that contain times in SQL I'm having a problem identifying a record in a database that has a date that includes a time. As an example, I have a record containing a date that is (2014-03-30 11:11:11.333). I need to be able to change that date to 2014-03-30. So far, I've tried this:

```
ALTER TABLE dbo.Account
DROP CONSTRAINT DF_Account_ACTIVATION_DATE
DROP CONSTRAINT DF_Account_UPDATED_DATE
GO
CREATE TABLE dbo.Account (
  Id INT NOT NULL,
  Login VARCHAR(100) NOT NULL,
  Password VARCHAR(200) NOT NULL,
  Name VARCHAR(50) NOT NULL,
  Email VARCHAR(100) NOT NULL,
  ActivationDate DATETIME NOT NULL
  DEFAULT GETDATE() )
GO
ALTER TABLE dbo.Account ADD
CONSTRAINT DF_Account_ACTIVATION_DATE
DEFAULT (GETDATE())
GO
ALTER TABLE dbo.Account ADD
CONSTRAINT DF_Account_UPDATED_DATE
DEFAULT (GETDATE())
GO
CREATE INDEX IX_Account_Id ON
dbo.Account(Id)
GO
```

So far, this code works fine, and the activation date is no longer a problem. The issue I'm having is that I need to update the record in the database, and according to this: You cannot update a value in SQL Server that has a time portion that is determined by the system clock, because SQL Server automatically truncates any time portion at midnight. This is different from all other database systems that retain the time portion. As a result, SQL Server is
