Great tool By maui18, on 07/13/2009 I am happy to find a tool like this and it is so easy to use. I think this is a great tool to have if you need to make a backup of your movies. 5 of 5 users found this review helpful. I like the extra tools. By geek\_the\_w, on 12/09/2008 I like the extra tools. The only thing that's wrong with this is that the features' titles don't come up on the drop down menus. It's hard for me to tell which feature is which. That being said, it works. The only question is, will the tool work after the final update? 3 of 3 users found this review helpful. no BD Lite support, or other camera drivers. By JM\_T, on 10/16/2008 No BD Lite support, or other camera drivers. 3 of 3 users found this review helpful. waste of time By eureka, on 10/15/2008 waste of time 3 of 3 users found this review helpful. Would be much better if it did its job. By foadofoad, on 06/29/2008 Would be much better if it did its job. 5 of 6 users found this review helpful. I found this useful. By Sho Tojo, on 04/11/2008 I found this useful. I thought it was pretty straightforward. The only thing I didn't like was that the Xvid codec didn't work with it. I don't know why that is. If you know the reason, please tell me, or I'll contact the developer. 5 of 5 users found this review helpful. Simple and effective. By Agent Confusion, on 03/16/2008 Simple and effective. 2 of 2 users found this review helpful. Good idea By Mr.Doc, on 02/22/2008 Good idea 2 of 2 users found this review helpful

Thats how you protect your media with Any DVD Shrink. Ideal as a basic backup program, this DVD protection software allows you to create a virtual DVD database of your discs. Its easy to use and just as powerful as any other DVD protection program. Not even a DVD copying pro will be able to beat the advanced backup features this tool offers. Any DVD Shrink Key Features: Backup your DVD collection, DRM-Free Restore your own or friends DVD collection, DRM-Free Embed DRM-Free Movies on your iPod/iPad/iPhone Burn copy of protected DVD and ISO image files for burning DVD burning tool: You dont need any physical DVD-Writing software Protection: Protects DVDs from scratches, or water damage Restore: Allows you to get the content back, if you re-rip it Software: 60 days money back guarantee Any DVD Shrink Purchase Now What can I say? I think you have to buy this one and see for yourself. I have been looking for a good backup solution and this one fits the bill perfectly. I was using Backupella and decided to try to use Anydvdshrink after some trial and error. It works great and is a small size, only comes in an exe. It took me no time to get it configured and set up. The interface is simple to use and the windows wizard did a good job in getting me up and running. Both dvdshrink and Any DVD shrink use a very small part of the processor and never starts to bog down. Any DVD shrink works great for me, but i think its the best for the users who dont have any knowledge or experience in copying DVD, like my roommate because it automatically selects to rip data from a DVD instead of having to specify which sectors to rip. Its fast and does exactly what it says, burns, copies and protects DVD. I have used this before on my XP computer and now that I have it on my Vista and it works 100% for me. I have had trouble with other programs with protecting my DVDs, but this one works. I will leave it up to you to judge the software. Its so simple to use and does exactly what it says it will. Its safe to say that this is one the best programs you can get for your backups. I got it for all my DVD's with high quality and b7e8df5c8

To start, it's time to copy all your MP3/AAC/WMA files to the hard disk and rename them. To do this, follow the instructions on the computer you're using (for example, if you're using Windows XP, launch the Media Player in the Start menu). As soon as you open it, you'll be greeted by the Music library. Drag and drop the files you want to copy to the desired location. If you select a large number of files, you'll be asked to complete the operation in batches. Once you're done copying all of the files, you'll be able to start burning your CD/DVD. Create your CD/DVD using Windows Media Player and manually choose the ISO image file you want to use. A confirmation window will appear and it's time to click OK. To start, you'll be asked to select an output folder in which to save your newly created CD/DVD. After you're done, the program will ask you if you want to start creating the files. Choose the "Create" option and click OK. How to burn MP3/AAC/WMA files to a CD/DVD in a few simple steps. Step 3: Click
